SUMMARY

Frontend-focused Full-stack developer with strong expertise in React.js, JavaScript(ES6+), and modern frontend development, along with backend experience using Flask and RESTful APIs. Skilled in building AI-powered web applications integrating OpenAI, Gemini APIs, and RAG pipelines. Proven ability to develop scalable, responsive, and production-ready applications with clean UI/UX and efficient backend systems.

TECHNICAL SKILLS

- **Frontend** - React.js, JavaScript(ES6+),HTML5, CSS3, Tailwind CSS
- **Backend** - Python, Flask, RESTful APIs
- **Databases** - PostgreSQL, Vector Databases (Learning)
- **AI/LLM** - OpenAI API, Gemini API, LangChain, RAG(Retrieval-Augmented Generation), HuggingFace
- **Developer Tools** - Git, GitHub, Docker, Linux, VS Code

EXPERIENCE

Python Backend Developer Intern

Ziion Technology, Mohali

Duration: 45 Days

- Developed backend APIs using Python and Flask for web-based applications
- Designed and implemented RESTful APIs for efficient data communication.
- Optimized server-side workflows for improved data processing.
- Worked on debugging and improving backend performance and code structure.
- Contributed to backend modules supporting CRUD operations and real-time data handling.

PROJECTS

Boutique Management System - Full Stack Web Application

Tech Stack: React.js, Flask, PostgreSQL, Tailwind CSS, REST API

- Built and deployed a full-stack web application for managing customer orders, inventory, and measurements.
- Engineered a responsive React dashboard, improving workflow efficiency and usability.
- Integrated RESTful APIs using Flask for scalable backend operations.
- Structured PostgreSQL database for efficient relational data handling.
- Deployed on cloud (Render), ensuring high availability and performance.

Loan Repayment Prediction System - AI Web Application

Tech Stack: React.js, Flask, Python, Tailwind CSS

- Engineered an AI-powered system to predict loan repayment probability.
- Built an interactive frontend with real-time handling and result visualization.
- Integrated backend APIs for prediction logic and data processing.
- Implemented features such as prediction-history tracking and PDF export functionality.
- Developed an admin dashboard to monitor predictions and feedback.

Generative AI & LLM Projects

Tech: LangChain, Ollama, Docker, HuggingFace

- Built and experimented with RAG pipelines using embeddings and vector search.
- Developed local LLM setups using Ollama and offline AI processing.
- Implemented AI agent workflows using LangChain.
- Integrated multiple LLM APIs into a real-world application.

EDUCATION

Master's in Computer Applications (MCA) - I.K. Gujral Punjab Technical University, Jalandhar | 2024

- Present

Bachelor's in Computer Applications (BCA) - Punjabi University, Patiala | 2021-2024

12th (Non-Medical) - P.S.E.B - Veer Haqiqat Rai Model Sr. Sec. School, Patiala | March 2019

10th - P.S.E.B - Veer Haqiqat Rai Model Sr. Sec. School, Patiala | March 2017
